1.2 Solution to hard chess puzzle 0007

At this puzzle, next **move** is by **White**. The objective of the puzzle is to **checkmate** in 3 **moves**.

mate in 3 moves can be done by following these steps. You need to give series of discovered **checks**

1. You have to move your **pawn** at **c file**. This will lead to a discovered attack from your **queen** at b3 to the opponent's **king**.

2. Now the king is forced to **move** to e5. The queens attack can not be blocked by their pawn at d file since it will expose their king to a check by your rook at sixth **rank**.
3. Now you need to give another discovered check by moving your knight c3 to d5. This move will expose their to a check by your **bishop**. The same move will block your queens attack which will be helpful in next move. Now their king will come back to e6
4. Now you can move your knight to c7 by capturing the pawn and give a double discovered check. You are attacking the king by two pieces - queen and knight. The king can not escape from this attack and will result in a **checkmate**.
